Used Dilute Phase Conveying System - New 2004. Manufactured by Dynamic Air Conveying Systems. Consisting of the following components:

3 - Dynamic Air Bulk Bag unloader style H-100

3 - Dynamic Air, Air Pad Feeders capable of conveying 365 cu. ft. per hour. Each carbon steel construction

1 - Bag Buster combination Dust Filter/Manual bag break station - carbon steel construction

1 - Weigh Hopper with 20 cu.ft. batch capacity carbon steel construction

1 - Rotary Feeder designed to feed maximum 600 cu. ft. per hour

1 - Pressure Blower package

2 - Receiving Hoppers with 100 cu. ft. capacity carbon steel construction.

2 - Dynamic Air Series 669 Modu-Kleen Reverse jet top removal modular bin vent filter systems

2 - Air pad Feeders designed to convey 365 cu. ft. per hour carbon steel construction

1 - Set of 3 load cells

Dynamic Air Model 200 series 343 Modu-Kleen Reverse Jet dust collector carbon steel construction.

Also included Allen-Bradley MicroLogix Programmable Controller and PanelView 300 Operator Interface.

Available Mix tanks with 40 HP Myers Mixers.

Type of System: LDP 2000 Low Density Pressure Concept

Conveying distance: 60 feet

Conveying Line Size: 3 inch

System Rate: 4600 lbs./hour

Individual items maybe available separately.

Still installed as operated. Complete Specifications available on request.
